DETAILED ACTION

Election/Restrictions

1. This application is in condition for allowance except for the presence of claims 1-6 to invention non-elected without traverse. Accordingly, claims 1-6 have been cancelled.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

A) Cancel claims 1-6.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: the prior art discloses a method of operating a device having a generator, an internal combustion engine, a flywheel and a clutch. However, the prior art fails to show, in combination with the invention, a combustion engine having a centrifugal mass for stabilizing the engine and before the combustion engine is started, the flywheel generator is decoupled from the combustion engine and the flywheel generator is brought into effective connection with the energy source until the flywheel has reached a specified speed and the combustion engine is then connected to the flywheel generator by a non-form engaging clutch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
